

Competitors News

Your networking competitive-intelligence analyst, live in Webex.

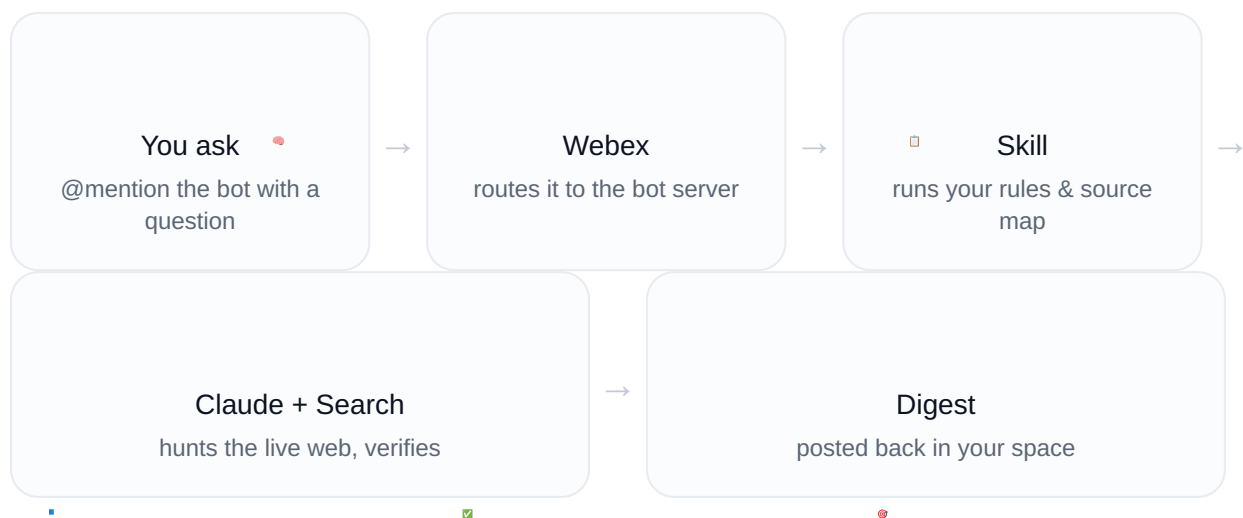

Trained on your competitive-news skill

@mention in any Webex space

Live web hunt — never from memory

Primary-source URL on every claim

HOW IT WORKS

WHY IT MATTERS

Runs your playbook

Operates on the exact competitive-news skill you wrote — watchlist, hunt order, source map and editorial rules baked in.

Verified, not vibes

Every claim is dated and tagged [VERIFIED] / [INFERRED] / [UNVERIFIED] / [STALE], with a clickable primary source.

Cisco lens built in

Doesn't just list news — flags the competitive implication for Cisco on the items that matter.

Pick your brain

Choose the model and reasoning effort per question. Compare two models side by side in one command.

Cross-check sources

Switch between Claude search and Tavily — or compare them — for source diversity and rigor.

Minutes, not mornings

A full competitor scan in one message, any time, from the space your team already lives in.

COMMAND CHEATSHEET

Just ask	Type a question. No flags = <code>Sonnet 4.6</code> <code>high effort</code> <code>Claude search</code>
Pick a model	<code>-opus 4.8</code> <code>-opus 4.7</code> <code>-sonnet 4.6</code> <code>-fable 5</code> <code>-haiku 4.5</code>
Set effort	<code>high</code> <code>medium</code> <code>low</code> deeper reasoning = higher
Pick a search engine	<code>-tavily</code> <code>-brave</code> omit for built-in Claude search
Compare side by side	<code>-compare opus 4.8 sonnet 4.6</code> <code>-compare tavily claude</code>
